CONNECTING CALIFORNIA CONTRACTORS TO CONSTRUCTION BIDDING LEADS • EST. 1994

Cadiz Taps Two Builders for \$403M Southern California Water Pipeline

A major water infrastructure project is moving into the construction phase in San Bernardino County, where Cadiz Inc. has awarded contracts to two established heavy-civil firms to build out its Northern Pipeline. The roughly \$403 million effort will convert a 220-mile natural gas pipeline into a water conveyance system designed to deliver supplies to communities across Southern California. The work marks one of the more unusual large-scale water projects to reach the construction stage in the region, repurposing existing linear infrastructure rather than trenching an entirely new corridor.

W.M. Lyles Co. and Mike Bubalo Construction Co. have been selected as the builders on the project. Both bring deep experience in California water and underground work, and their selection signals that the pipeline conversion is transitioning from planning into active field execution. For contractors and suppliers watching Southern California's water sector, the award is a clear indicator that meaningful subcontracting and material-supply opportunities are now in play along a very long project alignment.

The driving force behind the project is the persistent search for new and reliable water supplies in the Southern California interior. San Bernardino County and surrounding communities face the same pressures confronting much of the state: constrained imported supplies, aging distribution systems, and growing demand. Converting a former natural gas line into a water conveyance route allows Cadiz to establish a long-haul delivery backbone while leveraging an existing 220-mile corridor, an approach that can reduce some of the permitting and right-of-way hurdles that typically slow greenfield pipeline construction.

In concrete construction terms, the scope centers on transforming a pipeline originally engineered to move natural gas

into one capable of safely and reliably carrying potable or raw water. That conversion is not a simple swap. It involves inspecting and rehabilitating the existing steel pipe, addressing internal linings and coatings suited to water rather than gas, and reworking or replacing valves, fittings, and appurtenances throughout the alignment. Pump stations, metering facilities, and control structures will typically be required to move water across such a long distance and to interconnect with receiving systems.

Because the pipeline stretches 220 miles, the work will almost certainly be executed in phases and across multiple geographic segments. Long linear projects of this type lend themselves to sequenced construction, with crews mobilizing along defined reaches to perform excavation at access points, tie-ins, and structure locations. Earthwork will be needed wherever the existing line must be exposed, repaired, or reconnected, and wherever new above-ground facilities such as pump stations and storage or metering sites are built. Site grading, foundations, and containment structures at those facilities represent discrete packages of work.

CONTINUED INSIDE →

Cadiz Taps Two Builders for \$403M Southern California Water Pipeline

CONTINUED FROM THE COVER

The conversion also carries a heavy mechanical and electrical component. Pumping water across a corridor of this length requires substantial horsepower, meaning pump and motor installation, piping manifolds, and associated electrical service and controls. SCADA and instrumentation systems to monitor flow, pressure, and water quality along the route are standard on modern conveyance projects. That combination of civil, mechanical, and electrical scope means the project will draw on a broad spectrum of trades rather than a single discipline.

For contractors, the range of work suggests opportunities well beyond the two prime builders. Pipeline rehabilitation and coating specialists, welders and pipe fitters, electrical and instrumentation contractors, pump and mechanical installers, and earthwork and grading crews all have a potential role. Concrete subcontractors will be needed for structure foundations and facility slabs, while suppliers of pipe fittings, valves, pumps, and control equipment stand to benefit from procurement on a project of this magnitude. Firms with experience in remote, long-corridor work in the California desert environment will be particularly well positioned.

The scale of the contracts, totaling approximately \$403 million, underscores the volume of labor and material the project will consume. Work spread over hundreds of miles and multiple facility sites typically translates into extended schedules and sustained crew demand, which can be attractive for subcontractors looking for backlog stability. It also means logistics, staging, and access planning will be significant considerations, given the length of the alignment and the likelihood that portions run through sparsely developed terrain.

With the prime contracts now awarded, the immediate opportunity for other firms lies in the subcontractor and supplier tiers. Contractors interested in participating should be reaching out to W.M. Lyles and Mike Bubalo Construction to

understand how the work will be packaged, which segments will be prioritized, and what specialty scopes the primes intend to subcontract. Establishing relationships early, before segment-by-segment buyout accelerates, is often the difference between winning packages and missing them on projects of this length.

Firms positioning for a role should prepare to demonstrate relevant experience in water conveyance, pipeline rehabilitation, and desert or remote-corridor construction. Documenting qualifications for pump station and electrical work, coating and lining scopes, and long-haul pipe handling will help subcontractors stand out. Given the water-utility nature of the end use, contractors should also anticipate the quality, testing, and disinfection requirements that accompany potable water systems, and be ready to staff accordingly.

More broadly, the Cadiz Northern Pipeline reflects a continuing appetite in California for creative water-supply solutions and the construction dollars that follow. As the state wrestles with drought cycles and supply reliability, projects that add new conveyance and delivery capacity are likely to keep generating work for heavy-civil, mechanical, and electrical contractors. The repurposing model at the heart of this project may also draw attention from other agencies weighing whether existing linear infrastructure can be adapted for water use.

For Southern California builders, the message is straightforward: a large, multi-phase water project with hundreds of millions of dollars in construction value is now under way in San Bernardino County. Contractors and suppliers with the right qualifications should be tracking the project's phasing and buyout closely, engaging the two prime builders, and lining up the crews, equipment, and material commitments needed to compete for the packages that will roll out along the 220-mile route.

Cross-Border Sewage Crisis Signals Work at Imperial Beach

A persistent sewage pollution problem in Imperial Beach is disrupting local recreation, forcing a surf camp to bus children to cleaner beaches and prompting junior lifeguard programs to relocate up the coast, according to CalMatters.

The contamination stems from cross-border flows that have long fouled the waters near the San Diego County commu-

nity, an issue that has drawn attention to the aging and overwhelmed wastewater infrastructure serving the region.

For contractors, the ongoing crisis underscores the scale of treatment and conveyance improvements needed along the southern coastline. Federal and state efforts to address

transboundary sewage have historically involved upgrades to treatment plants and collection systems near the border.

Firms working in water and wastewater construction should watch for public funding tied to remediation of the Tijuana River watershed and related facilities, which could translate into future public-works opportunities in San Diego County.

Court Upholds SoCal Gas Appliance Limits Affecting Four Counties

A federal appeals court has cleared the way for Southern California air regulators to enforce new restrictions on the sale of certain gas-powered appliances, including commercial and industrial water heaters. The 9th Circuit Court of Appeals issued a 2-1 ruling last week upholding the limits.

The rules apply across four Los Angeles-area counties and had drawn opposition from businesses and developers who challenged the restrictions in court. With the ruling standing, the limits on gas commercial and industrial appliances can now move forward.

For contractors, the decision signals a continued push toward electrification in the region's commercial and industrial building sector. Mechanical and plumbing firms bidding new construction and retrofit work in the affected counties should anticipate specifications shifting away from gas appliances toward electric alternatives.

Developers and general contractors planning projects in the Los Angeles area may need to adjust equipment selections and coordinate with subcontractors on compliant systems, potentially affecting cost estimates and scheduling on upcoming work.

Skanska-Stacy Witbeck Team Wins \$1.9B LA Light Rail Segment

A joint venture between Skanska and Stacy Witbeck has secured a \$1.9 billion contract to build a new light rail segment for the Los Angeles County Metropolitan Transportation Authority.

The team will construct a 6.7-mile at-grade line in Van Nuys, adding to Metro's expanding transit network in the San Fernando Valley.

The large-scale award signals continued heavy investment in Southern California transit infrastructure, opening opportunities for subcontractors and suppliers tied to rail, grading, and civil work along the corridor.

Contractors pursuing public transit work in Los Angeles County should watch for subcontracting and procurement packages as the project moves into construction.

Skanska's LAX Outreach Signals Openings for Small, Local Contractors

Contractors chasing public work in Southern California have a fresh data point on how large program managers are filling out their subcontractor rosters. On a major project at Los Angeles International Airport, general contractor Skanska met its small business hiring targets, and the firm's disadvantaged business enterprise compliance officer, Teresa Maxwell, has laid out the playbook the company uses to connect with contractors located near its job sites.

The takeaway for firms working California public works is straightforward: the demand for qualified small, local, and disadvantaged business enterprises on big airport and infrastructure programs is real, and the primes running those programs are actively looking for firms to fill those roles. For subcontractors that have historically struggled to break into large, complex projects, the outreach effort at LAX represents a concrete example of how those opportunities are being distributed.

Large public projects like the ongoing modernization work at LAX typically carry participation goals for disadvantaged business enterprises. Those goals, tied to the flow of federal and local funding that supports airport and transportation improvements, obligate the prime contractor to make good-faith efforts to award a defined share of the work to certified small and disadvantaged firms. Meeting or exceeding those goals, as Skanska reported doing, requires deliberate recruitment rather than waiting for bids to arrive.

Maxwell's account centers on how Skanska reaches contractors that operate in the communities surrounding its projects. That local-first approach matters to firms in Los Angeles County and the broader Southern California market, because it suggests that proximity to the work and roots in the local trade community carry weight when a prime assembles its team. Contractors that can demonstrate a nearby footprint and relevant experience stand to benefit from that preference.

For firms weighing whether to pursue subcontract packages on airport programs, the scope of work on a facility like LAX spans nearly every trade. Airport modernization generally involves extensive sitework and earthwork, utility relocation, concrete structures, terminal and roadway improvements, and heavy mechanical, electrical, and plumbing systems. Specialty trades ranging from concrete and steel to electrical, HVAC, low-voltage systems, and finishes all find a place on projects of this size.

That breadth is precisely why participation goals create genuine opportunity. A single large program can be broken into dozens of subcontract and supply packages, and many of those packages are sized in a way that smaller firms can realistically pursue. Certified disadvantaged and small business enterprises that position themselves early can compete for scopes in earthwork, paving, structural work, mechanical and electrical systems, materials supply, trucking, and professional services tied to the construction effort.

The changes referenced in Skanska's outreach discussion point to an evolving environment for DBE requirements on federally supported work. For contractors, shifting rules around certification and participation can mean both new eligibility and new competition. Firms that stay current on how these programs are administered, and on which certifications open doors on airport and transit work, will be better placed to capture the packages that primes are required to distribute.

The practical lesson from the LAX experience is that primes are building relationships before bid packages hit the street. Skanska's model of reaching out to local contractors indicates that the firms that show up early, register with the relevant certification programs, and make themselves known to the prime's outreach staff are the ones who get invited to bid the right scopes.

San Diego Braces For El Niño Storm Infrastructure Work

San Diego is preparing for a forecasted "super El Niño" winter that could bring severe flooding and coastal storm damage, putting a spotlight on the region's aging stormwater systems and century-old dams.

The condition of the city's outdated drainage networks and old dam infrastructure raises the prospect of upgrade and repair work as officials move to reduce flood risk ahead of extreme weather.

Contractors interested in this kind of work should first confirm their certification status. Disadvantaged business enterprise, small business enterprise, and related certifications are the gateway to participation credit on federally funded projects, and a current certification is often a prerequisite for a prime to count a firm toward its goals. Firms that let certifications lapse or never pursue them may find themselves shut out of packages they could otherwise win.

Beyond certification, firms should make direct contact with the compliance and outreach staff who assemble project teams. The account from Skanska underscores that these officers actively track which local contractors are available and capable. Getting on that radar means providing clear information on bonding capacity, relevant past work, available crews and equipment, and the specific trades a firm self-performs.

On bid timing, contractors should recognize that outreach and prequalification typically run well ahead of formal subcontract solicitations. The primes that hit their participation targets do so because they cultivate a pool of qualified local firms in advance. Waiting until a bid advertisement appears often means arriving too late to be considered, so firms should engage program teams during the planning and early construction phases.

For the Southern California construction community, the LAX example is both a reminder and an invitation. Large airport, transit, and infrastructure programs continue to generate substantial subcontracting work across the region, and the mechanisms that steer a share of that work to small, local, and disadvantaged firms are being actively used by at least one major prime. Contractors that keep their certifications current, understand how participation goals shape award decisions, and build direct relationships with outreach staff will be best positioned to turn these programs into signed subcontracts.

For contractors, aging stormwater and dam assets typically translate into demand for civil and water-infrastructure projects, from drainage improvements to structural rehabilitation of dams.

Firms working in San Diego County should watch for accelerated public-works spending tied to storm preparedness and emergency repairs as the El Niño season develops.

REQUEST FOR QUALIFICATIONS/PROPOSALS (RFQP)

Subject to conditions prescribed by the University of California – UC Davis Health, responses to Design-Builder's

RFQP documents are sought from Proposers for the following Project and bid package:

**Hospital Bed Replacement Tower (RHT) Project
SESP Renovations Phases F, G, H, & I Project
UC Davis Health**

Bid Package #SR-04:

02-05 Demolition
09-15 Ceramic Tile
09-30 Floor Covering
09-60 Painting & Coating
09-80 Resinous Flooring
10-10 Misc. Specialties

Description of Work: The SESP Renovation Phases F, G, H, I Project construction includes renovation of the interior of the SESP building (approximately 28,000 SF) and must be completed prior to the Occupancy of the upcoming Replacement Hospital Tower (RHT) project (separate project).

Construction in the SESP includes but is not limited to:

Phase F - 1st floor Emergency Department remodel - Build out of treatment rooms and associated Nurse Station, Dictation, Consult Rooms, Storage, etc.

Phase G - 1st Floor - Reconfigure existing patient space into Pediatric ED Resuscitation, Consult, Sub Waiting, Storage, Soiled Utility, and House Keeping. Add additional Patient **Toilet Room**.

Phase H - Basement - Demo On-Call Sleep Rooms to Expand Corridor and add Staff Toilet Room to support On Call. In Existing CPU - Convert Non Sterile Receiving to Staff Work Room. Convert Existing Storage Room to Vendor Drop Off, and Staff Work Room. Reconfigure Men's and Women's Locker & Shower rooms by expanding into adjacent office space.

Phase I - Basement - Reconfigure Receiving/Breakdown, Surgical Supply, Scope Storage, and Staff Restrooms to expand Surgical Supply into the Existing CPU Staging area and widen the adjacent corridor. Reconfigure the existing GME area, Staff lounge and Locker Room to widen the adjacent corridor and provide expanded locker area. Reconfigure Existing Cart Washer for new equipment, add exhaust fan and duct to roof.

Work in this bid package includes construction services as separate contracts for Demolition, Ceramic Tile, Floor Covering, Painting & Coating, Resinous Flooring, and Misc Specialties scope for the SESP Renovation Phases F, G, H & I Project. All work in this bid package must comply with the UCDH RHT Project Labor Agreement (PLA). All work included in this bid package will be performed under the authority and jurisdiction of HCAi. The SESP Renovation Phases F, G, H & I project has an overall estimated direct construction cost (today's dollars) of \$36,000,000.00.

The Bid Package Target Values are:

02-05 Selective Demolition: \$900,000
09-15 Ceramic Tile: \$185,000
09-30 Floor Covering: \$600,000
09-60 Painting & Coating: \$170,000
09-80 Resinous Flooring: \$150,000
10-10 Misc. Specialties: \$600,000

McCarthy Building Companies, Inc. (MBC) has included qualifications for a qualifications based competitive selection process for Trade

Partner construction services relating to the SESP Renovation Phases f, G, H, & I Project. This Request for Qualifications/Proposals (RFQP) establishes the requirements for Lump Sum Proposal Submission by qualified Proposers. Lump Sum Proposals will be accepted only from qualified Proposers.

MBC reserves the right to reject any or all submittals and to withhold the award of this project for any reason it may determine.

Procedures: Proposal documents will be available on July 27, 2026 and will be issued electronically at BuildingConnected to potential proposers.

Mandatory RFQP Information Session & Job Walk: A Pre-Proposal Conference will be conducted on August 4, 2026; beginning promptly at 7:00 a.m. PST. Only trade partners who participate in the pre-proposal conference and job walk in its entirety will be allowed to bid on this project.

Site walk Address:
4620 V Street Bldg B (Big Sur Conference Room)
Sacramento, CA 95817

Proposals will be received electronically only at McCarthy's designated BuildingConnected site.

Qualifications & Cost Proposals must be received on or before 1:00 p.m., August 24, 2026.

Bid results will be provided by August 25, 2026.

Proposal Security in the amount of 15% of the Lump Sum Base Proposal, excluding alternates, shall accompany each bid. The surety issuing the Bid Bond shall be, on the bid deadline, an admitted surety insurer (as defined in the California Code of Civil Procedure Section 995.120)

All insurance policies required to be obtained by the trade partner shall be subject to approval by McCarthy Building Companies and University for form and substance. All such policies shall be issued by a company rated by Best as A or better with a financial classification of VIII or better or have equivalent rating by Standard and Poor's or Moody's.

The successful proposer will be required to have the following California contractor's license(s) at the time of the proposal opening:

02-05 Selective Demolition: C-21 Demolition
09-15 Ceramic Tile: C-54 Ceramic & Mosaic Tile
09-30 Floor Covering: C-15 Flooring & Floor Covering
09-60 Painting & Coating: C-33 Painting & Decorating
09-80 Resinous Flooring: C-15 Flooring & Floor Covering
10-10 Misc. Specialties: B General Building Contractor

Every effort will be made to ensure that all persons have equal access to contracts and other business opportunities with the University within the limits imposed by law or University policy. Each Bidder may be required to show evidence of its equal employment opportunity policy. The successful Bidder and its subcontractors will be required to follow the nondiscrimination requirements set forth in the Bidding Documents and to pay prevailing wages at the location of the work.

The work described in the contract is a public work subject to section 1771 of the California Labor Code.
California Wage Determination (2026-2) Date: August 22, 2026

No contractor or subcontractor, regardless of tier, may be listed on a Bid for, or engage in the performance of, any portion of this project, unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5 and 1771.1. This project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

The successful proposer shall pay all persons providing construction services and/or any labor on site, including any University location, no less than the UC Fair Wage (defined as \$15 per hour as of 10/01/2017) and shall comply with all applicable federal, state, and local working condition requirements.

p 510-234-0926 f 510-237-2435 www.overaa.com

We request bids from all qualified subcontractors and suppliers including DVBE/DBE/SDVOSB/SBE/MBE/VOSB/WBE's for the following Project:

Windsor SECONDARY TREATMENT SYSTEM UPGRADES PROJECT

Bid Date: September 3, 2026 until 2:00PM

Contact: Larry Etcheverry, larrye@overaa.com

Anna Stein, annas@overaa.com

Danny Holdren, dannyh@overaa.com

Scope of work includes: The work consists of dewatering the Water Reclamation Facility's aeration basin, further excavation and installation of a new concrete aeration basin facility with a flow splitting structure, air lines, diffusers, a mixing system, a surface wasting pumping system, and a high flow return pump connected to the adjacent high flow storage pond. In conjunction with the new aeration basin, a new blower building with internal blowers will be constructed with a separate electrical control building. Additional work includes a separate carbon feed building with internal tanks and chemical metering pumps, a below grade secondary clarifier weir flow splitting structure, and relocation of a concrete sand filter high flow diversion structure.

Duration: 482 working days with Intermediate Milestones

Disadvantaged Business Enterprise: DBE/DVBE/MBE/WBE/SBE participation is encouraged. Funding for this project may be provided in full or part through an agreement with the United States Environmental Protection Agency (EPA) Water Infrastructure Finance Innovation Act (WIFIA) program. Special attention should be directed to Section 9 of the Special Provisions, which outlines requirements for Contractors and Subcontractors based on this funding source.

Pre Bid Conference: January 14, 2026 at 10:00AM and a second bid walk date of January 28, 2026 at 10:00 A.M. at 8400 Windsor Road, Windsor, CA 95492-0100. Attendance at either mandatory bid walk will satisfy this requirement of qualified bidders.

Location: 8400 Windsor Road, Windsor, CA 95492

Documents are available at no cost on www.buildingconnected.com, login is required.

Electronic copies of the Contract Documents, including Proposal Forms, Plans, and Specifications will be available at no charge at the Town of Windsor website (<https://www.townofwindsor.com/bids.aspx>). Bidders will need to fill out a short informational form in order to gain access to the bid documents.

We encourage bids from all Subcontractors/Suppliers including DVBE/SDVOSB/VOSB/MBE/WBE/DBE/SBE bidders. We are an equal opportunity employer.

We encourage contracting with a group of DBEs when a contract is too large for one firm to handle individually. We offer to assist you with bonding, credit, and insurance. Acceptance of Subcontractor's bid is expressly conditioned upon Subcontractor's assent to all terms and conditions contained in the applicable Overaa standard agreement without modification. These agreements are available for viewing in the Bidding Opportunities tab on our website, <https://www.overaa.com/subcontractors/bidding-opportunities>. By submitting a bid, Subcontractor is certifying that it has read the applicable Overaa standard agreement (either the Subcontract Agreement or Purchase Order Agreement) in full and accepts all terms without modification. Further, by submitting a bid, Subcontractor waives any rights or claims it may have to modify the terms of the Overaa standard agreement, whether through negotiations, discussions, or other means.

Overaa's standard agreements include the right for Overaa to require Subcontractors to furnish a faithful performance and labor bond, in a form and from a surety acceptable to Overaa, in the amount of 100% of the Subcontract price. Subcontractors will be required to comply with all subcontract insurance requirements, which includes providing a waiver of subrogation endorsement to their workers compensation insurance. Overaa utilizes the environmentally-friendly Textura electronic invoicing and payment system to streamline and expedite subcontractor invoicing and payment. Service fees charged by Textura for processing of electronic payments to Subcontractor shall be the responsibility of Subcontractor. Please contact our office if you would like more information. We are signatory to both Carpenters and the Laborers Union Collective Bargaining Agreements.

Caltrans Spec Section 2-1.11 IN-USE OFF-ROAD DIESEL-FUELED VEHICLE LIST. CARB Certs required from listed Subs.

100% performance/payment bonds will be required for the full amount of the subcontract price. Please contact FDCI for any assistance to this solicitation, including obtaining bonding, insurance, equipment, materials and/or supplies. Provide subcontractor/supplier scopes/quotes as early as possible to enable estimators to perform a thorough evaluation of all quotes received. Quotes will be broken down into comparable packages as reasonably necessary to facilitate participation. Quotes must be valid for the same duration as specified by the Owner for Contract Award. We are signatory to Operating Engineers, Laborers, Cement Masons, Carpenters and Pile Drivers Unions. Non-signatory subs will be required to sign an agreement for trades covered under our union agreements. Flatiron intends to work cooperatively with subcontractors and suppliers for all bid items you are licensed and qualified to perform. Bid items can be split to facilitate participation from all certified firms. Flatiron will reimburse for bond premium up to 2%. Firms must possess & provide current contractor's license number & DIR Registration number on the quote. Firms must possess insurance and workers compensation coverage meeting project requirements. Waiver of Subrogation is required. Please contact Flatiron for any assistance required by your firm. Subcontractors/Suppliers will be required to execute our standard agreements and agree to the standard general terms & conditions. Copies are available for review on our Box.com ftp site upon email request.

To view and download projects docs for FREE from the Caltrans website you will need to "Create an Account" with Caltrans Bidding Connect. Project Location: 5150 Live Oak Avenue, Oakley, CA 94561
Project Duration: October 2026 – February 2028
Architect: HKIT

Project Labor Requirements: Prevailing Wage, Certified Payroll, Skilled and Trained Workforce as defined in Chapter 2.9 (Section 2600et seq.) of the Public Contract Code. There is not a PLA on this project. S+B James is signatory to the Carpenters and Laborers Union. All scopes under Carpenters and Laborers must use labor from respective unions.

Owner Controlled Insurance Program (OCIP): The District will have an OCIP in place on this Project

S+B James Prequalification Required: All bidders are required to prequalify with S+B James prior to bidding on this project. Contact Sabrina Naranjo sabrinanaranjo@sbjames.com for a prequalification link. S+B James uses TradeTap to qualify subcontractors.

Antioch Unified School District Prequalification: Prequalification of Contractor and MEP Subcontractors. In accordance with California Public Contract Code section 20111.6, the Contractor is required to submit to the District a completed set of prequalification documents on forms provided by the District and be deemed prequalified by the District prior to entering into the Contract for the Project. In addition, all mechanical, electrical or plumbing ("MEP") Subcontractors of any tier (contractors that hold C-4, C-7, C-10, C-16, C-20, C-34, C-36, C-38, C-42, C-43 or C-46 licenses), must also be prequalified. It is the responsibility of the bidder to ensure that all MEP Subcontractors holding any of the licenses listed above are properly prequalified. This prequalification requirement for MEP Subcontractors applies even if the subcontractor will perform, or is designated to perform, work that does not require one of the licenses listed above, but the subcontractor holds one of the licenses listed above. Prequalification documents are available from the Antioch

Unified School District website at https://www.qualitybidders.com/users/sign_up

Certified Business Enterprises: Antioch USD is committed to the utilization of Disabled Veterans Business Enterprises and Local Business Enterprises subcontractors and suppliers on this project.

Bids Due: Early Release Trades Bid Packages: 02B Survey, 03A Concrete, 05A Metals, 26A Electrical, 31A Earthwork, 32A Asphalt Paving, 32C Landscape, 33A Site Utilities due: 9/9/26, 3PM All Other Bid Packages due 9/14/26, 3PM

Job Walk (all trades)(not mandatory): 8/26 2PM
Pre-Bid RFIs Due: 9/2/26 @3PM

Bid Award Criteria: Bids will be evaluated based on a Best-Value Selection. Subcontractors will be chosen based on their ability to provide a combination of quality, efficiency, expertise, and cost-effectiveness. The goal of the best-value selection process is to identify Subcontractors who can deliver a project that meets or exceeds expectations in terms of quality, efficiency, and overall value.

ALL BIDS MUST BE SUBMITTED ON A PROJECT BID FORM AND SIGNED ITB FORM (INCLUDE BREAKOUTS) WHICH CAN BE FOUND IN BUILDING CONNECTED.

Contact Sabrina Naranjo, sabrinanaranjo@sbjames.com, 916-699-5381 for an invite to this project in Building Connected or Daniel Martinez danielmartinez@sbjames.com, 310-483-4771 for project specific questions.
