CONNECTING CALIFORNIA CONTRACTORS TO CONSTRUCTION BIDDING LEADS • EST. 1994

Federal Housing Law Could Prime Pump for California Builders

The largest single piece of housing legislation to clear Congress since at least 1990 has become law, and California's construction industry stands to feel the ripple effects. The measure took effect despite President Donald Trump's refusal to sign it, and its stated purpose is to jump-start housing construction across the country. For contractors, subcontractors, and public-works professionals who have watched California's housing pipeline stall under high costs and regulatory drag, the new law represents a fresh potential source of federal support at a moment when demand for new homes remains acute.

The legislation is not a single big-ticket construction program. Instead, it is described as a grab bag of regulatory tweaks, pilot programs, and targeted loans and grants. That structure matters for how firms should read the opportunity. Rather than one enormous appropriation flowing to a handful of megaprojects, the law spreads its influence across a range of smaller mechanisms designed to make it easier and cheaper to get housing built. Contractors accustomed to chasing large, clearly defined public bids will need to think differently about how these dispersed tools translate into actual work on the ground.

The regulatory changes embedded in the law are aimed at clearing obstacles that slow housing production. In California, where permitting timelines, environmental review, and local approvals routinely add months or years to a project's schedule, any federal effort to streamline the path to construction is significant. When approvals move faster, projects that have been sitting on the shelf can advance to the point where general contractors, framers, concrete crews, and the mechanical and electrical trades are actually called to the site. Firms that have kept relationships warm with developers stuck in the entitlement phase may see those projects revive.

The pilot programs are worth watching closely because they often serve as the testing ground for approaches that later expand into full-scale funding streams. For California builders, early participation in a federal pilot can mean an inside track on the kind of work that becomes routine down the line. Pilot efforts frequently target specific building types or delivery methods, and contractors with experience in modular construction, infill development, or affordable housing may find themselves well positioned if the programs favor those categories. Keeping an eye on which agencies administer these pilots, and where they choose to launch them, will be essential.

The targeted loans and grants are the most direct route from the new law to shovels in the ground. Loans that lower the cost of financing housing development can make marginal projects pencil out, and grants can fill the gaps that keep affordable and workforce housing from getting built. In a high-cost state like California, where land, labor, and materials all run above national averages, even modest federal subsidies can tip a project from concept to construction. That is precisely the kind of shift that generates demand for the full range of building trades, from site work and foundations through finish carpentry and landscaping.

Federal Housing Law Could Prime Pump for California Builders

CONTINUED FROM THE COVER

Because the law leans on incentives and enabling tools rather than a fixed schedule of appropriations, the timing of new construction work will depend heavily on how quickly federal agencies stand up the programs and how fast state and local partners respond. California's own housing agencies and local governments will play a central role in channeling federal dollars into buildable projects. Contractors should expect a lag between the law taking effect and the appearance of concrete bid opportunities, as rulemaking, program design, and local uptake all take time to unfold.

For firms that want to be ready, the immediate task is intelligence gathering. Understanding which provisions of the law apply to the kinds of housing being built in a given region, and which agencies control the money, will separate contractors who catch the first wave of work from those who arrive late. Developers and housing nonprofits are typically the entities that apply for federal loans and grants, so contractors looking to benefit should be cultivating relationships with those sponsors now, before the projects are fully funded and the bid packages are assembled.

The scope of work that could flow from a broad housing push covers the entire construction spectrum. New residential development requires grading and earthwork, utility connections, foundations and structural framing, roofing, plumbing, electrical, and HVAC systems, as well as the finishes and site improvements that complete a project. Infill and affordable projects in dense California markets often add complexity, from tight staging areas to structured parking and mixed-use components. Each of these elements represents a distinct trade opportunity, and subcontractors in every specialty

should be tracking where the housing activity is likely to concentrate.

California's chronic housing shortage means that any credible effort to increase production lands on fertile ground. The state has struggled for years to hit its housing goals, and the gap between what is needed and what gets built has kept prices high and pushed workers ever farther from job centers. A federal law explicitly designed to increase supply aligns with California's own stated priorities, which improves the odds that state and local officials will move to draw down the available funds and clear the way for new projects.

Still, contractors should temper expectations with realism. A grab bag of tweaks and pilots does not guarantee an immediate surge in bid volume, and much of the law's ultimate impact will hinge on implementation details that are not yet settled. The firms that come out ahead will be the ones that treat this as a multi-year opportunity rather than a one-time windfall, positioning themselves to bid as programs mature and funding becomes available in successive rounds.

The practical takeaway for California's building community is to stay engaged and informed. Monitor how federal agencies roll out the loan, grant, and pilot programs, watch which local jurisdictions embrace the regulatory streamlining, and build relationships with the developers and housing sponsors who will bring projects forward. For an industry that has weathered a difficult stretch of high costs and constrained pipelines, a new federal commitment to housing construction is a welcome signal, even if the work it generates will arrive in stages rather than all at once.

Cross-Border Sewage Crisis Signals Work at Imperial Beach

A persistent sewage pollution problem in Imperial Beach is disrupting local recreation, forcing a surf camp to bus children to cleaner beaches and prompting junior lifeguard programs to relocate up the coast, according to CalMatters.

The contamination stems from cross-border flows that have long fouled the waters near the San Diego County community, an issue that has drawn attention to the aging and overwhelmed wastewater infrastructure serving the region.

For contractors, the ongoing crisis underscores the scale of treatment and conveyance improvements needed along the southern coastline. Federal and state efforts to address transboundary sewage have historically involved upgrades to treatment plants and collection systems near the border.

Firms working in water and wastewater construction should watch for public funding tied to remediation of the Tijuana River watershed and related facilities, which could translate into future public-works opportunities in San Diego County.

Federal Housing Bill Aims at California Supply Shortage

A new federal housing bill described by supporters as a once-in-a-lifetime measure is intended to chip away at the housing shortage affecting both California and the nation, according to CalMatters. The legislation takes a broad approach, combining numerous smaller provisions rather than a single sweeping fix.

Backers hope the combined effect will help boost housing supply in a state where demand has long outstripped construction. For California, which continues to face one of the most severe housing shortfalls in the country, any measur-

able increase in production could translate into additional building activity.

For contractors and subcontractors, expanded federal support for housing could mean more residential work coming down the pipeline, though the specific mechanisms and funding levels will determine how much new construction actually results.

Firms bidding on housing-related projects should watch for how the bill's provisions are implemented in California and whether they open new opportunities for residential and affordable housing development.

Tutor Perini Hit With \$42.4M More in Philadelphia Hotel Dispute

Los Angeles-based Tutor Perini faces an additional \$42.4 million judgment tied to a contract dispute over its troubled construction of the W and Element hotels in Philadelphia, according to a recent court order.

The latest ruling adds to a \$174.6 million judgment issued in April, when the company was found liable for breach of contract on the project. The combined liability now tops \$217 million.

While the dispute centers on an out-of-state project, Tutor Perini is one of California's largest general contractors and a major player in public works across the state, from transit to highways. Litigation of this scale can weigh on a firm's bonding capacity and balance sheet, factors that owners and sureties weigh when awarding large California contracts.

Contractors and subcontractors that team with or compete against Tutor Perini on California public jobs should track how the ongoing legal exposure affects the company's financial standing on future bids.

San Francisco Bridge Lands \$107.5M Rehabilitation Project

A San Francisco bridge is set for a \$107.5 million makeover, marking a significant infrastructure investment for the Bay Area and a fresh opportunity for firms working in bridge rehabilitation and heavy civil construction.

The project adds to a busy pipeline of public-works activity in Northern California. Bridge upgrades of this scale typically draw specialty subcontractors in structural steel, deck repair, seismic retrofitting, and traffic control, giving qualified California firms a shot at scopes tied to the work.

Elsewhere in the roundup, Jacobs secured a military contract, Balfour Beatty put \$13.4 million into a technology venture capital fund, and Skanska signed a \$94 million deal to build a data center in Virginia. Those items fall outside California but signal continued national appetite for large public and private builds.

For contractors tracking California opportunities, the San Francisco bridge rehabilitation is the headline item worth watching as bidding and subcontracting details emerge.

Court Upholds SoCal Gas Appliance Limits Affecting Four Counties

A federal appeals court has cleared the way for Southern California air regulators to enforce new restrictions on the sale of certain gas-powered appliances, including commercial and industrial water heaters. The 9th Circuit Court of Appeals issued a 2-1 ruling last week upholding the limits.

The rules apply across four Los Angeles-area counties and had drawn opposition from businesses and developers who challenged the restrictions in court. With the ruling standing,

the limits on gas commercial and industrial appliances can now move forward.

For contractors, the decision signals a continued push toward electrification in the region's commercial and industrial building sector. Mechanical and plumbing firms bidding new construction and retrofit work in the affected counties should anticipate specifications shifting away from gas appliances toward electric alternatives.

Developers and general contractors planning projects in the Los Angeles area may need to adjust equipment selections and coordinate with subcontractors on compliant systems,

potentially affecting cost estimates and scheduling on upcoming work.

**INVITATION TO BID****CP361 Renewable Energy Improvements Project**

Engineers Estimate: \$42 - \$45 Million

Owner: Monterey One Water

Bid Date: August 20th, 2026 @ 3:00 P.M.

***** This is an electronic bid – please have quotes to MCI by 12pm on bid day to ensure the quotes
Have been received and reviewed*****

We are requesting quotes from all qualified Subcontractors and Suppliers but not limited to: CONCRETE MATERIAL, PIPE SUPPLIERS, PRECAST MATERIALS, MISC. METALS, CONCRETE FLATWORK, CONCRETE PAVEMENT/PUMPING/STRUCTURES (FLATWORK), CRACK SEAL, ELECTRICAL-BUILDING, CAULKING, REINFORCING STEEL, WELDED STEEL PIPE, PRE-ENG. METAL BLDG., PAINTING/COATINGS, VALVES/WATER MAIN/ TEMP FACILITIES

Project Description:

The project generally consists of but not limited to: replacement of digester gas piping and gas safety equipment and associated supports, replacement of two access roof hatches (cover and frame) on each digester with provisions for concrete repair, recoating interior headspace of each digester, concrete repairs to the four digesters and digester building, installing new level measurement device on each digester, installing five linear generators (purchased by M1W with an expected delivery date of approximately September 2028. Contractor shall coordinate the exact delivery date with manufacturer/supplier (Mainspring Energy, Inc.) and M1W.) and associated electrical, installing biogas conditioning equipment and RNG Upgrading system, installing a RNG injection pipeline from the RNG upgrading system to PG&E's injection station, replacing steam boiler and steam system appurtenances with heating water boiler and hydronic system, replacing existing waste gas flares with new enclosed flares, demolition of the Cogen facility and appurtenances, and other civil, structural, mechanical, electrical, demolition related improvements.

Project information, including plans & specifications can be found by contacting:

estimating@mountaincascade.com

Subcontractors must possess a current contractor's license, DIR number, insurance and worker's compensation coverage. Subcontractors will be required to enter into our standard contract.

Mountain Cascade, Inc. is a Union Contractors and is signatory to Operating Engineers/Carpenters/Laborers/Teamsters.

Please feel free to contact Mountain Cascade, Inc. at 925.373.8370 with any questions concerning bonding, insurance, lines of credit, and job overview. We look forward to your response.

a Contract Document for the Project, and is made a part herein.

The estimated cost for construction is approximately \$11,000,000.

This is a re-bid of the project which originally bid on Tuesday 6/30/26. Bidders for the Re-bid are limited to those who previously attended the Mandatory Pre-Bid Meeting at 9:00 AM on Thursday, June 4, 2026. Previously issued Addendums #1, 2 & 3 apply to this re-bid.

Contractor shall achieve Substantial Completion of the entire Work within 385 calendar days as provided in the Contract Documents. Contractor shall achieve Final Completion of the Work within 30 calendar days after Substantial Completion of the entire Work. Should Contractor fail to achieve Substantial Completion within the time as specified within the Contract Documents, Contractor shall pay to the Developer, as Liquidated Damages and not as a penalty, the amount of Two Thousand Dollars (\$2,000.00) for each and every calendar day after the expiration of the contractually required date for Substantial Completion that the Work remains incomplete. Developer may, in its sole and absolute discretion, withhold Liquidated Damages from payments to the Contractor as such damages accrue, or, at Developer's sole and absolute discretion, withhold Liquidated Damages from any payments due or that become due pursuant to the Agreement, including retention and final payment (pursuant to California Government Code §53069.85).

The successful Bidder shall possess the following valid California contractor's license classification(s): Class B - General Building Contractor's License at the time of the bid submittal. Bidder's license shall remain in effect at the time of the bid award and throughout the entire term of this Contract.

Each Bid must be submitted on the Bid Proposal Form provided as part of the Bid Document Package, including all required certifications and other documents. All Bids shall be submitted in accordance with the requirements of the Contract Documents, including the Invitation for Bids, the Bid Proposal Form, and the Standard Specifications, including, without limitation, Section 2 of the Standard Specifications, as modified through the Special Provisions. Each Bid must also be accompanied by security in the form of a Bid Bond issued by a corporate surety (and in the form included with the Bid Document Package), a certified check or cashier's check payable to the Developer, or cash.

Developer reserves the right, in its discretion, to accept the lowest responsive and responsible Bid, to reject any or all bids, to waive any informalities or irregularities in any Bid or the Bid process, to determine the responsibility of any Bidder, and/or to determine which Bid is most advantageous to the Developer. After the opening of Bids, Bids may only be withdrawn in strict accordance with the provisions of Public Contract Code section 5100, et seq. Bids must remain valid for a period of at least 90 days after the bid opening. Award of the Bid is subject to the availability of funds.

Any Bid protests shall be submitted via e-mail to Developer through Gary Albertson (galbertson@pmasacramento.com) and administered in accordance with Sections 3-3.01.B and 3-3.01.C of the Standard Specifications, as modified pursuant to the Special Provisions.

No contractor or subcontractor may be listed on a bid proposal unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5 [with limited exceptions from this requirement for bid purposes only under Labor Code section 1771.1(a)].

No contractor or subcontractor may be awarded a contract for the work unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5.

The successful Bidder shall be required to execute a Material and Labor Payment Bond and Performance Bond, issued by a corporate surety, acceptable to Developer, each for not less than one hundred percent

Morello Park Elementary School T.K. Building Project: Construction of a new approximately 2,800 SF T.K. Building including two (2) new TK classrooms and a playground. This includes all necessary upgrades.

Address: 1200 Morello Park Dr, Martinez, CA 94553

Alhambra High School New Gymnasium Project: Construction of a new approximately 9,500 SF Gym. This includes a new asphalt playground, fencing and all necessary ADA upgrades.

Address: 150 E. Main St, Martinez, CA 94553

Schedule:

August 2026 - August 2027

Phasing Plan & Project Milestone can be found in Appendix A.

Bridging Documents including plans and specs can be found in Appendix B.

Wage Requirements:

Project Labor Agreement (PLA)

Disabled Veteran Business Enterprise (DVBE) participation is encouraged.

Documents are available at no cost on www.buildingconnected.com, login is required.

We encourage bids from all Subcontractors/Suppliers including DVBE/SDVOSB/VOSB/MBE/WBE/DBE/SBE bidders. We are an equal opportunity employer. We encourage contracting with a group of DBEs when a contract is too large for one firm to handle individually. We offer to assist you with bonding, credit, and insurance. Acceptance of Subcontractor's bid is expressly conditioned upon Subcontractor's assent to all terms and conditions contained in the applicable Overaa standard agreement without modification. These agreements are available for viewing in the Bidding Opportunities tab on our website, <https://www.overaa.com/subcontractors/bidding-opportunities>. By submitting a bid, Subcontractor is certifying that it has read the applicable Overaa standard agreement (either the Subcontract Agreement or Purchase Order Agreement) in full and accepts all terms without modification. Further, by submitting a bid, Subcontractor waives any rights or claims it may have to modify the terms of the Overaa standard agreement, whether through negotiations, discussions, or other means.

Overaa's standard agreements include the right for Overaa to require Subcontractors to furnish a faithful performance and labor bond, in a form and from a surety acceptable to Overaa, in the amount of 100% of the Subcontract price. Subcontractors will be required to comply with all subcontract insurance requirements, which includes providing a waiver of subrogation endorsement to their workers compensation insurance. Overaa utilizes the environmentally-friendly Textura electronic invoicing and payment system to streamline and expedite subcontractor invoicing and payment. Service fees charged by Textura for processing of electronic payments to Subcontractor shall be the responsibility of

212319, 212321, 237110, 237310, 238120, 238910, 238990, 327320, 423510, 423990, 484220, 541330, 541990, 561730, 561990

S.P. Rados, Inc. is a Signatory Union Contractor. Subcontractors will be required to abide by the terms and conditions of the AGC Standard Long Form Subcontract incorporating prime contract terms and conditions, including payment provisions & insurance requirements. S.P. Rados, Inc.'s listing of a subcontractor is not to be construed as an acceptance of all the subcontractor's conditions or exceptions included with the Subcontractor's price quote. Subcontractors will be required to provide a payment & performance bond from an approved surety company for 100% of the subcontracted work. S.P. Rados, Inc. will pay bond premium up to 1.5% (optional).

Please be advised, Contractors and Subcontractors must register with the D.I.R. (Department of Industrial Relations) in order to bid on public works projects. Registration with the D.I.R. costs \$300 and covers the fiscal year (July 1 to June 30th). To verify status of your D.I.R. number, please visit: <http://dir.ca.gov/Public-Works/Contractors.html>

Assistance is available in obtaining bonds, lines of credit and/or insurance. We will consider dividing total requirements when economically feasible into smaller tasks or quantities to permit participation by DBE in the competitive process. We will assist in obtaining necessary equipment, supplies, materials & related assistance or services. S.P. Rados, Inc. requires that Subcontractors and Suppliers price quotes be provided at a reasonable time prior to the bid deadline to enable a complete evaluation.

Plans and Specifications are available free of <https://stevepradosinc.sharefile.com/d-sd7648508f9524b6593bb87a9409e6586> also available for viewing at 2002 E. McFadden Ave., Ste. 200, Santa Ana, CA 92705 call our office to schedule a review of the plans and specifications (714) 835-4612.

AN EQUAL OPPORTUNITY EMPLOYER

Run your outreach ad in every edition through your bid date – the-daily-reporter.vercel.app/ad-form

We request bids from all qualified subcontractors and suppliers including DVBE/DBE/SDVOSB/SBE/MBE/VOSB/WBE's for the following Project:

Windsor SECONDARY TREATMENT SYSTEM UPGRADES PROJECT

Bid Date: September 3, 2026 until 2:00PM

Contact: Larry Etcheverry, larrye@overaa.com

Anna Stein, annas@overaa.com

Danny Holdren, dannyh@overaa.com

Scope of work includes: The work consists of dewatering the Water Reclamation Facility's aeration basin, further excavation and installation of a new concrete aeration basin facility with a flow splitting structure, air lines, diffusers, a mixing system, a surface wasting pumping system, and a high flow return pump connected to the adjacent high flow storage pond. In conjunction with the new aeration basin, a new blower building with internal blowers will be constructed with a separate electrical control building. Additional work includes a separate carbon feed building with internal tanks and chemical metering pumps, a below grade secondary clarifier weir flow splitting structure, and relocation of a concrete sand filter high flow diversion structure.

Duration: 482 working days with Intermediate Milestones

Disadvantaged Business Enterprise: DBE/DVBE/MBE/WBE/SBE participation is encouraged. Funding for this project may be provided in full or part through an agreement with the United States Environmental Protection Agency (EPA) Water Infrastructure Finance Innovation Act (WIFIA) program. Special attention should be directed to Section 9 of the Special Provisions, which outlines requirements for Contractors and Subcontractors based on this funding source.

Pre Bid Conference: January 14, 2026 at 10:00AM and a second bid walk date of January 28, 2026 at 10:00 A.M. at 8400 Windsor Road, Windsor, CA 95492-0100. Attendance at either mandatory bid walk will satisfy this requirement of qualified bidders.

Location: 8400 Windsor Road, Windsor, CA 95492

Documents are available at no cost on www.buildingconnected.com, login is required.

Electronic copies of the Contract Documents, including Proposal Forms, Plans, and Specifications will be available at no charge at the Town of Windsor website (<https://www.townofwindsor.com/bids.aspx>). Bidders will need to fill out a short informational form in order to gain access to the bid documents.

We encourage bids from all Subcontractors/Suppliers including DVBE/SDVOSB/VOSB/MBE/WBE/DBE/SBE bidders. We are an equal opportunity employer. We encourage contracting with a group of DBEs when a contract is too large for one firm to handle individually. We offer to assist you with bonding, credit, and insurance.
